SEARCH USING PATIENT DEMOGRAPHICS

UR/MRN field

- Displays a list of patients with the UR number entered and any linked UR numbers (patients with multiple UR numbers may have them linked by the PURN team to improve data integrity)
- Note: the UR/MRN prefix may need to be included for UR/MRN searches other than the default laboratory set on the user's login.

Surname field

- Displays a list of patients with the same surname as entered
- **Note:** The Surname field is mandatory for a Name search to be initiated.
- The system will filter up to 1000 patients from the list of all patients associated to this patient demographic and display a patient list. Surname and Given/First Name searches names that sound similar.

	Demographics
UR/MRN:	
Surname:	
Given:	
DOB:	
Sev.	🔍 Male 🔍 Female
Sex:	Both
Clear	Search

Note: Date of Birth and or sex search fields cannot be used as a search option without part or the entire surname

SEARCH USING LOCATION ATRIBUTES

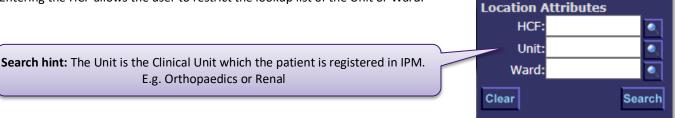

This feature is used to display patients according to the Health Care Facility (HCF), Unit (i.e. Clinical unit) or Ward that they are located in.

The default HCF is determined by your login

or

it can be set on the User Settings > Selection Default options along with the Ward and Clinical Unit

Entering the HCF allows the user to restrict the lookup list of the Unit or Ward.

HCF, Unit and Ward field

- The mnemonic may be entered and the search initiated OR
- Enter the <u>first letters of the any word</u> in the name of the location required, (as only 100 entries can be displayed)
 - Select the button 📖 to display lookup table. The refine function is available to further narrow the search
- Double click entry to populate it onto the required field

SEARCH USING DOCTOR AND / OR CONSULTANT

 HCF, Doctor and Consultant field The mnemonic may be entered and the search initiated OR 	Search hint: Doctor mnemonic starts with the first 3 letters of the surname followed by the first letter of the given/first name	Doctor and/or Co HCF: Doctor: Consultant:	onsultant
• Enter the <u>first letters of the any word</u> in th Doctor or Consultant required, (as only 10		Clear	Search

- Select the button keep to display lookup table. The refine function is available to further narrow the search
- Double click entry to populate it onto the required field

ICON STATUS

Viewing a list of reports, an icon may be seen which indicates the specific status for that report. **Note:** An envelope, page or hourglass will display if there are unviewed/unsigned off/pending pathology results in the list of results using Reports, Requests or Episodes view types.

The icon representing the most critical status of the results will display. E.g. where a result contains both normal and abnormal and results the icon representing abnormal results will display.

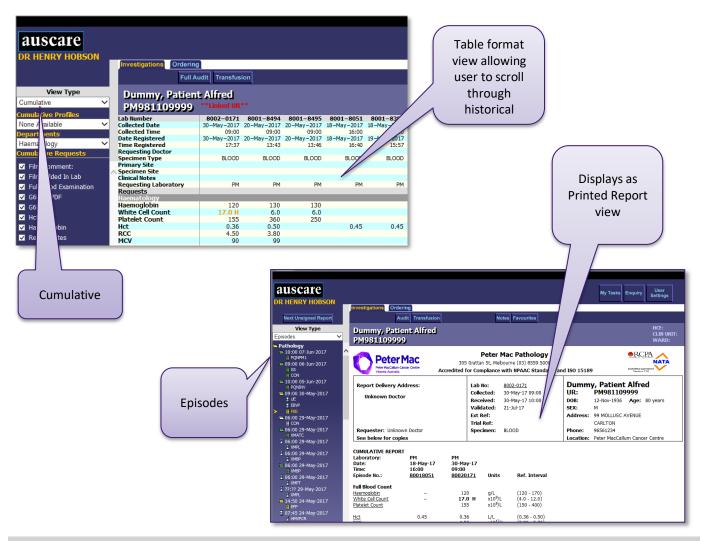

• If reports have not been signed off within the expected timeframe, the icons appear as **flashing** and will remain **flashing** until the reports are signed off. See page 40 regarding Sign Off.

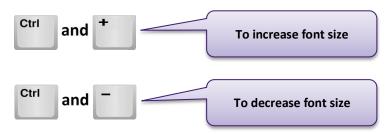

INVESTIGATIONS TAB

The Investigations Tab displays patient results in the body of the screen depending on the View Type selected in the left pane.

ZOOM IN OR OUT

• The altered font size is not retained between sessions of use.

VIEW TYPE

Each View Type uses a different results presentation'.

CUMULATIVE

<u>Cumulative</u> - view current and past pathology results in an aggregated format including numeric and non-numeric results, result comments and reference ranges.

Note: User needs to select and submit viewing options before a report will display.

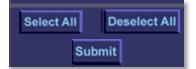

View Type Cumulative Cumulative Profiles None Available Departments ALL DEPARTMENTS (P)	Filter options Available using drop down menu Or Tick boxes
Cumulative Requests All Departments (P) ✓ Billing B74996 Anatomical Pathology ✓ 1p19q FISH ✓ FISH - 1 Probe ✓ Histology ✓ MYB FISH ✓ xxx00018 ✓ xxx001 Biochemistry ✓ Allergy referred 1	 Cumulative Profiles If none exist, then "None Available" will display in the drop down box. The User can create Cumulative Profiles (see page 20) Once selected, any Cumulative Requests that match this particular Cumulative Profile will have their check box ticked. Note: While in a current AUSCARE session, the Cumulative Profile selected from the drop down box will be remembered by the application when refreshing the Cumulative View screen.

Departments

- Display with the "ALL DEPARTMENTS" (For Pathology Division) by default
- A list of all the departments available can be selected from the drop down box

Cumulative Requests

- The Cumulative Requests displays a filtered list of all of the "Orderable Requests" that have been ordered for that patient for the selected Department. The requests are displayed in alphabetical order with a check box for individual selection.
- Note: For requests that can also be part of a panel the index on the left will display them individually if ordered as such in alphabetical order.
- Requests are selected via the tick boxes. The default is NO selection.

- 'Select All' or 'Deselect All' buttons are available to select or deselect the requests.
- The 'Submit' button will be available to submit the request. A message will display on screen: 'Collecting Data...'. The system refreshes the page on the right to display the selected cumulative results.

Viewing a Patient Report via Cumulative View

- The Cumulative View screen populates with all of the episodes that match the request list.
- The maximum number of episodes to be loaded onto the browser at any one time is 20 records.
- The episodes will display in COLLECTION date/time order with the most recent episode to the left hand side of screen.

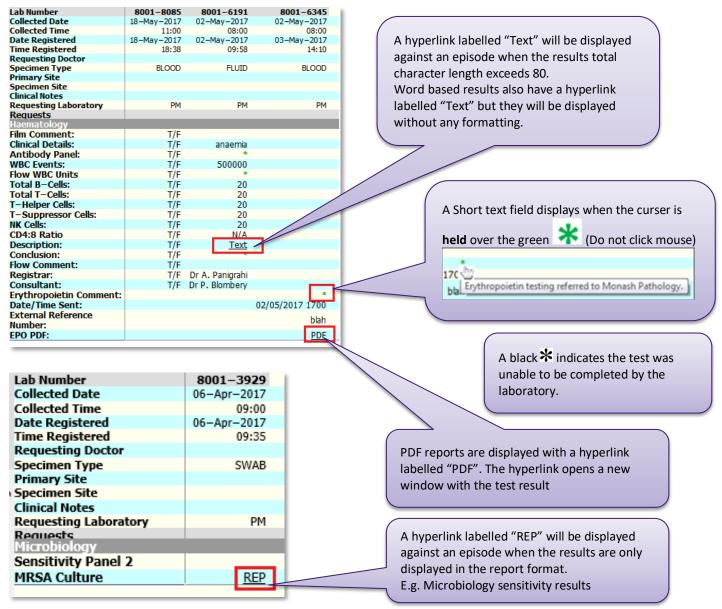

Results are colour coded and flag based on reference ranges, critical limits are configured for each test result.

- Black Result is within the reference range
- Orange Result is outside the reference range
- Red Result is critical

T/F = To Follow

Note:

• Not all 'interim' (unvalidated/unauthorised) results are available for the clinician to view in AUSCARE.

Use the 'Previous 20 Records' and the 'Next 20 Records' buttons to navigate through the Lab Numbers (or episodes).

Next 20 Records

Clinical Notes

A hyperlink labelled 'Text' displayed against the corresponding episode. Select the hyperlink to open a new window with the clinical note displayed.

Units and Reference Ranges

- Displayed in a fixed pane on the right hand side of screen.
- With the implementation of the new laboratory information system across PeterMac, Melbourne Health and Austin Health, a number of test 'Reference Intervals' have been reviewed and amended for harmonisation. When reviewing reports, please refer to the documented reference intervals that accompany pathology reports.

Audits

- Whenever the cumulative view is accessed, an audit entry will added to the full audit.
- Access to the full audit for the selected UR number is by selecting the Full Audit button.

Linked UR Numbers

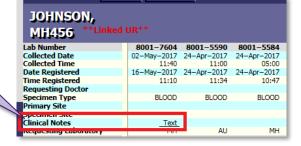

- The left pane will list all Cumulative Requests for each linked UR number (patients with multiple UR numbers may have them linked by the PURN team to improve data integrity)
- Next to the UR number in the patient header cumulative report screen "**Linked UR**" will display
- All episodes and test results for each linked UR will display in chronological order within the cumulative report screen, with the most recent episode to the far left of all episodes and
- Note: If a UR number is "unlinked" from other UR numbers, then the display will reflect this change.

Request Form

- When a request form is scanned in the laboratory the image can be viewed in AUSCARE
- Enquiry > Investigations > Cumulative View report screen for the patient UR number.

auscare	_			View the request form by selecting the

Once OK is selected, the new report page is generated and displayed with appropriate colour envelope status and the user can sign off the new report.

A report page version numbering system will increment each time a report page is changed (or re-generated). The audit entry appears as an event "Generated" in both AUSLAB (Enquiry Audit) and AUSCARE.

If the event "generated" is underlined, hover the mouse over the "Generated" event text will display the version number.

The audit also displays when the report has been accessed. When an event "Accessed" displays in the AUSCARE audit: hover over the "Accessed" event, text will display the version number. Select the underlined word and the report which was viewed will display. (This report may be the superseded report).

MELBOURNE HEALTH

REQUESTS

Requests - list of the "orderable" tests/panels which have been requested, which displays in the body of the screen as a replica of the hard copy or paper report in a HTML format

View Type Requests	The requests view provides a list of the "orderable" tests/panels (sorted alphabetically) which have been requested for the patient as per the AUSLAB.
 Pathology 1p19q. 11 Additional Same Testing- Allergy referred 1 Allergy referred 2 Allergy referred 3 Allergy referred 4 Alpha 1 Antitrypsin phenotype 	The request will appear with an associated folder indicating the highest overall status of the collective episodes contained within. Upon initially entering this view, by default the tests/panels folders are closed. The folders can be expanded to display the reports associated with each request of the test/panel.
■ Alpha subunit ■ Alpha-1-antitrypsin	

EPISODES

Episodes - displays the time and date of each request, which displays in the body of the screen as a replica of the hard copy or paper report in an HTML format

The episode view displays the time and date of each request (orderable test/panel) collection performed. Folders are displayed next to each request. The folder colour is specific to each group of requests according to the "icon (envelope) status".

If there are several tests in a format panel with different statuses, the folder colour displayed will be the highest overall status. By default all folders are open*, and the gold arrow will generally point to the first request available for signoff on the most recent episode.

*An exception occurs for patients with more than 100 lines of episode and test information displayed in the episode view. In this case the first 100 lines of episode and test information are viewable. Beyond this limit all episodes which have all their pathology signed off, will appear as closed folders.

ORDERING TAB

Please do not use this functionality as it is not current business process.

AUSCARE provides organisations with the functionality to electronically order pathology requests using the AUSCARE web interface. The software is intended ideally for use in a clinical setting that has wireless infrastructure and can incorporate the use of mobile PDA's and printers in wards for specimen collection and labelling. This process greatly reduced the risk of labelling and collection errors.

Note: The patient must be known in the AUSLAB system to use this functionality.

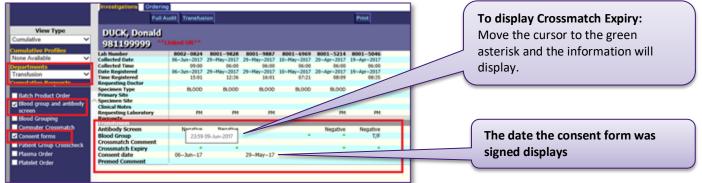

HOW TO LOOK UP A VALID CROSSMATCH AND CONSENT VIA CUMULATIVE VIEW

NOTE: THE INFORMATION AVAILABLE HERE HAS BEEN REPORTED IN AUSLAB, NOT TRANSFERRED FROM THE PREVIOUS LABORATORY INFORMATION SYSTEM (DÉTENTE).

FAVOURITES

•

- The Favourites screens provide the ability to define lists of patients of Personal Favourites or Shared Favourites.
 - 1. Personal Favourites are a list of patients which you have created to streamline your personal workflow
 - 2. Shared Favourites are a list of patients which you or another user has created to streamline the workflow for a number of users who require the results of the same group of patients.
 - 3. The System Administration function is privilege based and enables a user to make changes (modify and delete) Shared Favourites created by another user.
- Personal and/or Shared favourites lists can only be viewed in My Tasks > Favourites when they are set up and have entries (patients added to them).

Navigation: User Settings > Favourites

1. Delete a Shared Favourite from the Available Shared Favourites for <HCF/Unit> table

Navigation: User Settings > Favourites > System Administration

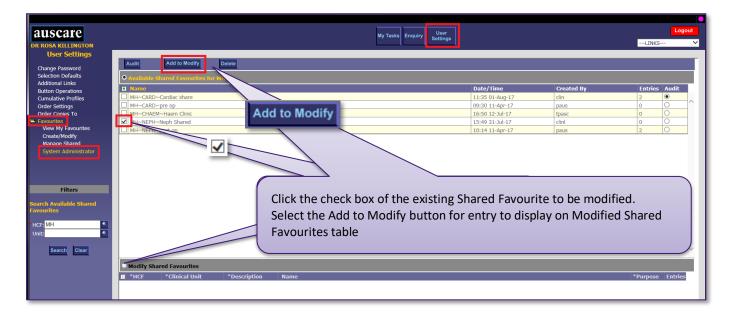

On the System Administration screen you are able to delete any shared favourites whether you created it or not.

2. Modify a Shared Favourite from the Available Shared Favourites for <HCF/Unit> table

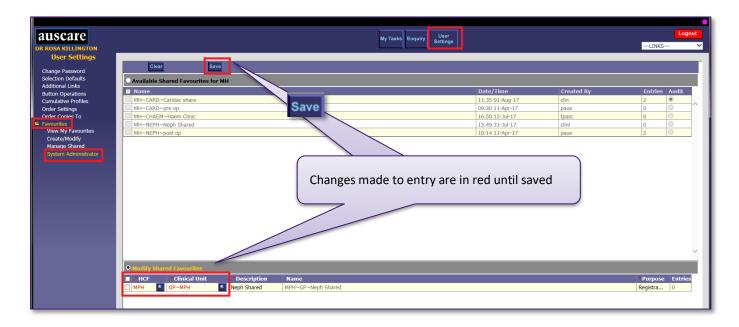

Navigation: User Settings > Favourites > System Administration

On the System Administration screen you are able to modift any shared favourites whether you created it or not.

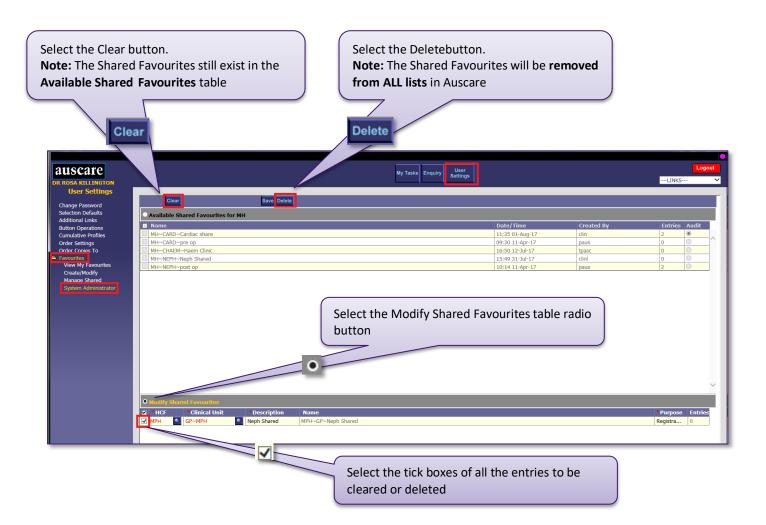

MELBOURNE HEALTH

3. Clearing or Deleting Shared Favourite(s) from the Modify Shared Favourites table

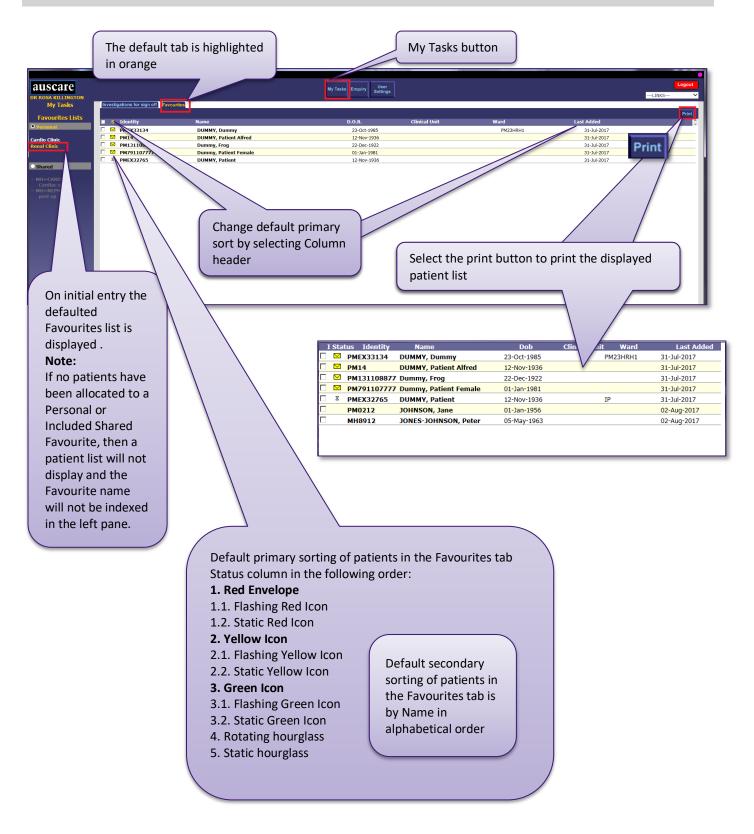

MY TASKS BUTTON

Users are able to access their Investigations for Sign Off, Referrals for Review and Favourites.

MY TASKS - FAVOURITES

MY TASKS INVESTIGATIONS TO SIGN OFF

When the requestor of the episode has been configured with a doctor user ID, the patients for which that doctor has requested tests will display on this screen.

E.g. Dr Smith has the Doctors User ID on the AUSLAB Provider Table.

When Dr Smith logs into AUSCARE, the Investigations to Sign Off screen displays any patient Dr Smith has requested tests for and has not signed off.

Note: Interim reports that are not yet available for sign off do not appear on this list. They can be found by performing doctor or consultant search.

SIGNING OFF REPORTS

The facility to sign off a report enables the clinician to document that they acknowledge reviewing selected report. Prior to sign off the icon will be displayed with a coloured status (red, green or yellow) as **per Page 6.**

Sign Off

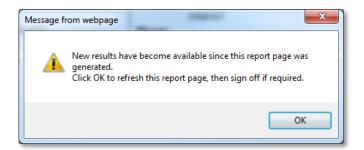

When a report page is signed off, the associated coloured icons will change to white icon with lines 🗐 (Signed Off) against the 'Episodes' 'Reports' and 'Requests' View Types.

An entry of the event is placed into the Audit history.

There are a few ways to access the results to sign off reports

- 1. Via the Enquiry screen
- 2. Via My Tasks Favourites
- 3. Via My Tasks Investigations to Sign off

NOTE: If a report has been updated between the time if was generated on your AUSCARE screen and the time you select the Sign Off button an alert displays in a popup message .

3. Via My Tasks - Investigations to Sign off

The Investigations to Sign Off screen displays all patients the User has requested tests for and those tests are available to view and not signed off.

SIGN OFF WHILE AUSLAB IS UNAVAILABLE

The system the pathology department is using to populate results in AUSCARE is called AUSLAB. When AUSLAB is not available electronic messages are not able to pass between the two systems.

Clinicians have the ability to sign off reports while AUSLAB is unavailable and synchronize the sign off update across all servers. Status and audit updates of these sign off events will be accessible once AUSLAB becomes available.

AUTO SIGNOFF / TIMEOUT SIGNOFF

1. Auto Signoff:

AUTO Signoff is the process in AUSCARE where reports are automatically signed-off by the system.

2. Timeout Signoff:

Timeout Signoff is the process in AUSCARE where reports are automatically signed-off by the system six months after the entire report becomes available for sign off.

(Note: Each icon colour may be set to a different time frame.)

At this time the coloured status icon for the report not signed off by clinical staff, will be automatically signed off by the system and will change to grey.

When a report has been automatically signed off by the system a grey icon with lines will be displayed on the Episodes, Reports and Requests view types.

The AUSCARE audit displays the event "Automated time elapsed system signoff".

3. Undo Signoff

Undo Sign Off

The Undo Signoff button will only appear if the current report displayed has been signed off.

The undo signoff action can be performed wherever the button displays. The statuses will be regenerated and the associated envelopes will return to their appropriate colour. An entry which includes the user and time of the event is placed into the Audit history to indicate the report has been "Unsigned Off".
