

Trauma Service Guidelines

Title: Trauma Team Activation (Call and Alert)

Developed by: K. Gumm, J. Papson, P. Morley, R. Judson, M. Van Den Driesen & The Advisory Committee on Trauma

Created: Version 1.0 November 2003

Revised by: K. Gumm, R. Judson, M. Walsh and The Advisory Committee on Trauma

Revised: Version 5.0 March 2017, V 4.0 Mar 2014, V 3.0 Jan 2012, V 2.0 Nov 2009

RMH “TRAUMA CALL” GUIDELINES

TRAUMA CALL

A **Trauma Call** will activate the entire trauma team

If paging system down DIAL 444 State “Trauma Call”

NO TRIAGE ASSESSEMENT NECESSARY DIRECT TO TRAUMA BAYS or RESUS CUBICLES

VITAL SIGNS

Blood Pressure < 90 mmhg

Heart Rate <60 or >120

O₂ Saturation < 90%

Respiratory Rate <10 or > 30

GCS ≤ 9

PENETRATING

All penetrating injuries to the neck

MULTIPLE PATIENTS

3 or more trauma patients are expected

PREGNANCY & TRAUMA

≥20 weeks with ruptured membranes

and /or PV bleeding

and / or fetal HR <100

- accepts no liability for any loss or damage suffered by any person as a result of that person, or any other person, placing any reliance on the content of such information, including any stated or inferred interpretation or opinion.”

RMH “TRAUMA ALERT” GUIDELINES

TRAUMA ALERT

A **Trauma Alert** will notify the Surgical Registrar
If paging system down DIAL 444 State “Trauma Alert”

NO TRIAGE ASSESSEMENT NECESSARY *DIRECT TO TRAUMA BAYS or RESUS CUBICLES*

SPECIFIC INJURIES

Burns > 20% &/or Airway Burns

GCS 10-13

High fall > 3 metres

Suspected spinal cord injury

Fractured pelvis

Serious Crush Injuries

Limb amputation

Major open fracture dislocation

≥ 2 Long bones fractures

BLUNT INJURIES

Obvious severe blunt chest trauma

Obvious severe blunt abdominal trauma

PENETRATING

Penetrating injuries to head &/or torso

Interhospital transfers

Major trauma transferred to RMH

PREGNANCY & TRAUMA

Any pregnant woman ≥ 20 weeks gestation sustaining trauma

All members of the trauma call panel (with pagers) are notified of the trauma alert,
but are not required to attend unless requested.

RMH "TRAUMA ALERT" GUIDELINES DEFINITIONS

SPECIFIC INJURIES
Burns > 20 and/or Airway "soot in airway" is sufficient evidence for burns to respiratory tract
GCS 10-13 Signs of open or closed head injuries, blood/ CSF leaks, skull fractures, GCS of 10-13
High Fall > 3 metres
Suspected Spinal Cord Injury Any spinal cord or suspected spinal cord injury
Fractured Pelvis Structural or suspected structural damage to pelvis, or pain ≥ 3 in the context of the case (i.e. the mechanism of force must be clear)
Serious Crush Injury Extensive skin loss, deep tissue damage
Limb Amputation Above the wrist or ankle
Major Compound or Open Dislocation Major compound fractures / open dislocations above ankle / above wrist
\geq Long bones Humerus, tibia, femur,
BLUNT INJURIES
Obvious severe blunt chest trauma <ul style="list-style-type: none"> • Structural or suspected structural damage to the thorax • e.g fractured ribs, fractured sternum, pneumothorax, and ruptured diaphragm (exclude isolated scapula) Pain ≥ 3
Obvious severe blunt abdominal trauma <ul style="list-style-type: none"> • Rigidity, guarding, rebound tenderness, distension or pain ≥ 3 • Blunt injuries that have revealed bleeding from internal sources e.g haematemesis, haematuria, haemoptysis
PENETRATING INJURIES
Penetrating injuries to head & /or torso Other than superficial (includes) impaling; patients with multiple superficial cuts /abrasions are excluded
